Response to Amendment

1. Applicants' request for reconsideration filed on 5/26/2006 has been reviewed.
2. Applicants' amendment filed on 5/26/2006 has been entered.
3. Applicant's arguments filed 5/26/2006 have been fully considered but they are not persuasive.
4. The applicants contend, " As per claims 1-20, the heart of the invention is that both the JTAG TAP and the JTAG TAP master are both provided on the same chip with the core logic. Although the cited art shows all of the elements of claim 1, they are not shown all on the same chip."

The examiner disagrees and would like to point out that Texas Instruments (IEEE std. 1149.1 JTAG TAP Masters with 8-bit generic host interfaces, embedded test-bus controllers; SCBS676D, December 1996-Revised August 2002) teach to master an IEEE std. 1149.1 (JTAG) test access port (TAP) under the command of an embedded host microprocessor/microcontroller (page 1, Texas Instruments). The examiner would like to point out that the Embedded Test Bus Controller (eTBC) in Texas Instruments' document is similar to a JTAG master. The same arguments regarding claim 1 apply to independent claims 9 and 19.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Art Unit: 2138

7. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Texas Instruments (IEEE Std. 1149.1 (JTAG) TAP Masters with 8-bit generic host interfaces, embedded test-bus controllers; SCBS676D – December 1996-Revised August 2002) in view of Patavalis (A Brief Introduction to the JTAG Boundary Scan Interface, pages 1-6, Athens, November 8, 2001). Please see the office action mailed on 2/24/2006 for details.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
